ABOUT ME

I am a student of Computer science speciality with a specialization in modeling, designing and computer graphics. I'm good at programming, I'm studying several programming languages and design, so I guess I will be a good candidate for working on IT projects.

Also I have leadership and communication skills, and these help me easily find a common language with somebody without different problems, I'm a good listener and I can work in a team, I like solve different difficulties, find answers to questions and help to team members. I am good at time management. I am responsible for the tasks assigned.

EDUCATION

Bachelor

National Technical University "Kharkiv Polytechnic Institute"/Kharkiv
Sep 2019 - May 2023

Master's Degree

National Technical University "Kharkiv Polytechnic Institute"/Kharkiv
Sep 2023 - Till now

PROJECTS

Course work on the topic: "Finding out the technical capabilities of a ready-made web application for the distribution of educational information"

Feb 2022 - Till now

The project is still in the process of improvement, because the web application is on a local server. I am currently working on hosting the site and adding new features to users.

Course work on the topic: "Development of a 3D model"

Oct 2021 - Jan 2022

I developed a 3D model of the future drone in the SolidWorks environment.

WORK EXPERIENCE
